

DANILO LANNOCCA

FULL STACK DEVELOPER

SUMMARY

Enthusiastic entry-level software developer with a strong foundation in programming, web development, and project management, currently working as an Analyst Programmer at Ultradata in the banking sector. After completing a Computer Science degree, I moved into professional software development, where I strengthened my technical expertise and problem-solving abilities in real-world environments. My recent experience as a Project Manager in the construction industry has sharpened my skills in communication, teamwork, and deadline management, transferable strengths that I am excited to bring to the tech industry.

I recently completed a Higher Education Diploma of Web Development at Coder Academy with a High Distinction, further enhancing my technical skills and reaffirming my passion for software development.

EDUCATION

- Advanced Diploma in Web Development**
Coder Academy, 2025
- Diploma in Building and Construction**
Della International College, Melbourne, VIC
Graduated: January 5, 2021
- Degree in Computer Science**
University of Salento, Lecce, Italy
Graduated: July 13, 2009

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, HTML, CSS, SQL, PHP, C, C#
VB.NET, .NET Core
- Frameworks:** Flask, React, Bootstrap
- Databases:** PostgreSQL, MongoDB, MySQL
- Networking:** CCNA knowledge

KEY SKILLS

- Effective Communication:** Skilled in delivering information clearly to clients, builders, and team members on-site.
- Problem Solving:** Identify issues promptly and develop effective solutions, even under tight deadlines.
- Team Collaboration:** Work well with different teams and lead a production team to ensure projects are delivered on time.

WORK EXPERIENCE

Analyst Programmer

03-2025 / Current

Ultradata, Melbourne, VIC, AU

Provider of banking and financial software solutions

Roles and Achievements

- Developing and maintaining banking systems using **C# and VB.NET within .NET Core** environments.
- Designing and integrating **SOAP and RESTful** APIs to support secure and reliable financial transactions.
- Writing and optimizing **SQL** queries for data management, reporting, and performance improvements.
- Working in an Agile environment, collaborating with developers, analysts, and stakeholders.

Intern, Software Development

09-2009 / 10-2015

S.E.I. S.p.A. Taviano, LECCE, Italy

Electronic solutions, including proprietary software and hardware

Roles and Achievements

- I was part of the team developing fully functional remote management tools for a multimedia and interactive system deployed across various sites.
- Completed the application port of existing software from VB6 to **VB.NET** on schedule, modernizing the application and improving compatibility with newer systems.
- Developed strong programming skills in **VB.NET, PHP, and SQL**, giving effective contributions to project goals and improving data management processes.

KEY PROJECTS

Merry Berry – Smoothie & Açai Shop Ordering System

<https://github.com/danilo90lan/Merry-Berry-Akai-Shop>

- Developed a full-stack web application for a smoothie and açai shop, enabling seamless online ordering and business management.
- Implements user authentication and role-based access using Firebase Authentication.
- Supports cart functionality and secure payment processing via Stripe.
- Includes an admin dashboard for managing products, orders, and inventory.
- Optimized backend performance with caching and database indexing.
- Tech Stack:** Node.js, Express, MongoDB, React, Firebase Authentication, Stripe

COURSES

- **CISCO CCNA Certification**
2010 - LE, Italy
-

LANGUAGES

English Italian

KEY PROJECTS

WeatherWise - Forecast React App API

https://github.com/danilo90lan/Forecast-react_app_API

- Developed a modern weather application that delivers real-time weather updates and forecasts. Users can search, save, and view weather details for multiple locations with intuitive UI elements.
- Displays current temperature, humidity, wind speed, and conditions.
- Provides hourly and 7-day forecasts with detailed weather insights.
- Auto-detects user location and supports manual search.
- Saves favorite locations using local storage.
- **Tech Stack:** React, JavaScript, OpenWeather API, LocalStorage, Geolocation API.

API Web Server - Currency Exchange App

https://github.com/danilo90lan/API_Web_Server_Currency_Exchange

- Built a backend API for managing multi-currency accounts with real-time currency exchange.
- Users can open accounts, deposit funds, and exchange currencies at current rates from a third-party API.
- Features secure JWT authentication and background tasks for regular rate updates
- **Tech Stack:** Python, Flask, PostgreSQL, Marshmallow, APScheduler, Open Exchange Rates API, JWT for authentication.

File Transfer Application

https://github.com/danilo90lan/LAN_FileTransfer.git

- Developed a VB.NET client-server application during my internship for sending and receiving files over a network using TCP sockets, with a user-friendly graphical interface.
- Implemented features for selecting, sending, and receiving files with a progress bar to track transfer status.
- **Tech Stack:** VB.NET, Winsock2005DLL, TCP/IP Sockets, Windows Forms for GUI.

JARVIS - Terminal ChatBot AI

<https://github.com/danilo90lan/JARVIS-Terminal-ChatBot-AI.git>

- Created a command-line virtual assistant that interacts with users using OpenAI's GPT API for engaging, conversational dialogue.
- Features include conversation history tracking, error handling with a retry mechanism, and easy customization options.
- **Tech Stack:** Python, OpenAI API utilizing API key authentication for access

EMPLOYMENTS

Project Manager

2018 - 2026

Mirajj Kitchen and Cabinets, Sunshine North, VIC, AU

Manufacturing and installing kitchens and furniture for new commercial and residential projects

Roles and Achievements

- Responsible for leading projects from their initiation through completion on time and within budget.
- Successfully delivered an average of 4 to 5 projects per week, enhancing the company's productivity and reputation.
- Acquired new clients based on installation quality and builder satisfaction with final results, particularly in terms of attention to details and adherence to schedules.
